## smartPanel

4.3"

## Starting with the small smartPanels up to the large, high-performance Panel PC, we offer you the complete HMI product range.

Often the interaction between humans and machines is carried out via operating devices which are connected with the heart of the installations. Right here the operating devices are deployed. Whether from the smallest installation up to large, multiple networked machines that are deployed worldwide.

Regardless of which system you choose they are all founded on the same basis and so they can be used for all project engineering and programming, starting from the smallest up to the largest one.

tries for years. The range of the systems deployed is as wide as the applications and technologies in the respective installation.

Our Touch Panels have proven themselves in many applications in all indus-

## smartPanels - The smartest choice for high usability, performance and featuring OPC UA connectivity in one panel.

10.1"

### Quality

• Robust and durable -IP66 protection rating (front)

## Functionality

• The smartPanels come with Movicon 11 and Windows Embedded Compact 7, for resource intensive applications

## smartPanels in detail

- Slim Profile
- Robust housing
- Powerful scripting capabilities

### **Open for teleservice**

• By means of the VNC-Client software you can also have access to your smartPanel via teleservice

## Panel PCs - Intelligent control and monitoring with PC performance in the control cabinet.

With the Panel PC series you are best **Further features** equipped for all control and monitoring tasks. Combinig the most modern performance features and the highly accurate and responsive projected capacitive touch-screen, our Panel PC series concetrates the highest usability in the smallest space.

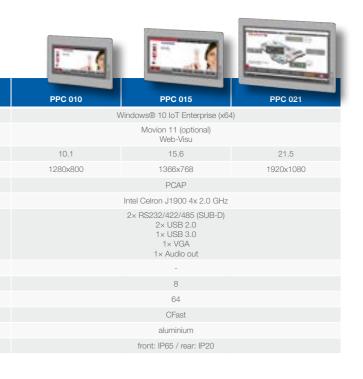

The latest Intel Atom processor technology, large integrated work memory and display resolutions up to Full-HD in the 21.5" Panel PC leaves nothing to be desired. The Windows system environment which most users are familiar with, means there is no wasting time learning how the system works. The Panel PCs also have many useful interfaces. The visual impression of your control cabinet is enhanced considerably by the high-quality materials of the Panel PCs.

## MOVICON

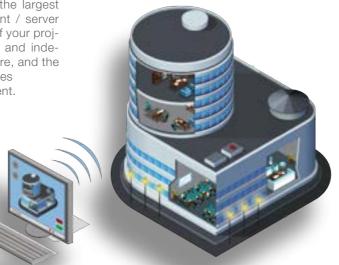

Movicon is the safe and reliable Movicon is the standard for industrial SCADA, SoftLogic and data analysis.

the solutions for the users become amount of time and resources ergonomic, open, flexible, and easy you can save on development. to maintain. Movicon excels over all other SCADA/HMI platforms in regards to openness, user friendliness, and performance. The unique Movicon software is completely XML based. Moreover, it relies on open and new upcoming standards such as web service, SVG, OPC UA, SQL, ODBC, .NET and Java for Web-Client solutions.

software solution for all those who automation, remote maintenance, indevelop and operate visualization dustry and building automation. This applications and whose data also universal platform is suitable for evhas to be available for mobile tech- ery field of application and completenologies. The success of your project depends on how open and inde-Development times become shorter, pendent your applications are, and the

**Comprehensive creatable graphic library** 

Easy, but effective instruction functions and graphic animations. 16 animation features for objects, among them motion, transparency functions, colors, color fillings, text editing etc.

### Editable vector graphics

with powerful design and layout functions in 32 levels. The objects have an effective inheritance concept and support an Alias Parameter Management.

## Process data storing in data loggers

with object-based management. Automatic ODBC connection for archives in relational data bases. In-memory data base support for the alternative recording in encodable text and XML files.

### Automatic recipe control

on the basis of relational data bases or text files. Self-configurable recipes. Archiving in data bases and creation of the graphic user surface with only a few clicks.

## Extremely efficient connectivity via the integrated I/O driver

Integrated specifications: OPC UA, DA and XML DA. Certificated OPC compatibility. Real-time data-separable, also via shared data base charts or via an I/O driver in the Shared Memory.

## Data import from the PLC

All important drivers support the automatic tag import from the PLC program. Tag import from every system (e.g. MS Excel).

## Line displays

"Even though line displays have become very rare in the market, we still have them in our programme. This is due to our sustainable product policy, but also because our customers still ask for line displays. And we listen to our customers."

## The text display TD 03

- Conceptualized for the deployment with our CPUs and Siemens CPUs
- Programmable with TD-Wizard

## The operator panel OP 03

- For operating and monitoring small applications
- Programmable with OP-Manager or Siemens ProTool

## The commander compact CC 03

- Controller and panel in one with a 100V PLC at the back. Programmable with Siemens STEP7
- 16 digital inputs and outputs
- Programmable with OP-Manager or Siemens ProTool

Its deployment is extremely space saving. They are individually customizable – with your logo, notes or whatever else.
